

DIPLOMA IN FULL-STACK MEDIA PRODUCTION

CONCENTRATION: TECH FOCUS

A T-Shaped curriculum combining a common foundation with specialized expertise.

semester 1: The Common Trunk

All students take these foundational modules together to ensure cross-functional literacy.

Institute Fundamentals

History, values, and creative mindset

Visual Research & Logic

Mood boards, algorithms, and concept development

Storytelling & Media Literacy

Narrative structures across all mediums

The Pipeline (Module)

Camera to Server: End-to-end workflow understanding

Design Fundamentals

Color theory, typography, and layout

Coding Basics

HTML/CSS/JS logic for non-coders

Project Management

Agile, Scrum, and team collaboration

semester 2: Specialization

Deep dive into 60% Code. (20% Design & 20% Media applied).

SOFTWARE ENGINEERING

Full Stack Development

React, Node.js, and Databases

Cloud Computing

AWS/Azure media hosting

API Integration

Connecting services and data

DEVOPS & SECURITY

CI/CD Pipelines

Automated deployment workflows

Cybersecurity Basics

Protecting user data

App Development

iOS and Android basics

FINAL TERM: THE CAPSTONE

The Merger Project

Cross-functional teams collaborate. Tech builds the site, Design skins the UI, Media provides the content.

Note: This curriculum is designed to produce "Digital Architects" capable of working across the entire media production pipeline.
